

Course: COS 200**Course Title: Computer Information Systems** (3 credit hours)**INSTRUCTOR**

Professor	Xinxing Wu
Office	Hathaway Hall 307
Office Phone	You can reach me on my personal phone 617-259-6772 if needed.
Email	xinxing.wu@kysu.edu (Best way to reach out)

COURSE DETAILS

Semester	Spring 2026
Class Time	Online. Welcome to discuss 12:00PM-2:00PM (TR)
Classroom	Virtual meeting/Canvas
Office Hours	Posted on Office Door or by Appointment

University Catalogue Description

This course shows an overview of computer-based information systems, major models, applications and functions from a component perspective. Learn to describe physical and logical aspects of systems. Learn to present related materials with intermediate HTML.

Course Objectives

A study of computer-based information systems which includes major models, software, hardware, applications and functions relative to information systems. It also includes the management of information systems resources and introduces the use of emerging technologies such as telecommunications, information appliances, Internet, intranets, extranets, programming languages and the World Wide Web.

Learning Outcomes

THE FOLLOWING LIST ARE THE PROGRAM OUTCOMES AS DEFINED FOR COMPUTER SCIENCE PROGRAMS BY ABET:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Competency Levels

THE FOLLOWING LIST ARE THE STUDENT LEARNING OUTCOMES FOR THIS COURSE AND HOW THEY ARE MAPPED TO THE OVERALL PROGRAM OUTCOMES MENTIONED ABOVE, ALONG WITH THEIR LEVEL OF COMPETENCY. THE COMPETENCY LEVELS

ARE:

I Introduced **R** Reinforced **M** Mastered

UPON COMPLETION OF THIS COURSE, STUDENTS WILL BE ABLE TO:

- Students will identify system development life cycles and phases as well as security/privacy/ethical issues related to the information systems and computer field. **I**
- Students will apply their knowledge of data usage and storage by creating, editing, executing, and storing data using software application packages at varying levels of complexity. **I**
- Students will illustrate their understanding of the foundations and fundamentals of information systems, the management of information systems, and the organization for computers and information systems through class discussions and critiques. **R**
- Students will enhance their learning by collaborating as a team to exchange ideas and to illustrate their knowledge of CIS by completing an Information System oriented managed project by planning, documenting, and presenting. **R**
- Students will discuss communities and work structures relative to virtual teams, and how managers can take control of Information Technology. **R**

Course Thoro10

1. Communicate Effectively.
2. Think critically to solve problems and create new ideas and solutions.
3. Apply quantitative reasoning skills to analyze and solve numerical problems.
4. Interact effectively with people from different backgrounds.
5. Adapt to changing circumstances while leading and supporting others.
6. Perform professionally.
7. Engage in civic life to improve society.
8. Collaborate and work in teams.
9. ☒ Apply academic knowledge, skills, and abilities.
10. Use information for decision making.

Hallmark Assignment - Lab 5: SIS - Web Portal

- CPE Essential Skills #9 will be assessed using the **AACU VALUE Rubric: Inquiry and Analysis (Thoro 10)** Rubric.
- Thoro10 Essential Skills: 9. Apply academic knowledge, skills, and abilities.
 - In this lab, students will demonstrate the ability to connect theoretical concepts learned in class with practical skills by designing and implementing a functional Student Information System (SIS) web portal relevant to real-world professional environments.
- **Hallmark assignment** in Canvas: [Link](#)

Required Texts

Course Calendar/Schedule

The course schedule is tentative and may be adjusted based on practical class needs. 😊 The instructor reserves the right to make changes or impose additional requirements as necessary.

Note: Artificial Intelligence (AI) Tool Usage - If you use any AI tool at any point in your work, you must clearly and fully disclose its use in your assignment, report, project submission, or any other deliverable. Your disclosure must be specific and detailed, including 📌

- Where AI was used (e.g., summarizing readings, generating ideas, code assistance, debugging, data analysis, data visualization, outlining, editing).
- What tool(s) were used (tool name and, when available, version/model, plus platform/app).
- Why you chose to use the tool (e.g., brainstorming, translation, grammar checking, accelerating coding, improving clarity).
- How you used the output (e.g., modified/edited, cited/quoted, directly included, used only as a reference, used to compare against your own work).
- Other details as needed. 😊 The instructor reserves the right to impose additional disclosure requirements as necessary.

 Important: Failure to disclose AI use—or presenting AI-generated work as entirely your own without clear clarification—may be considered a violation of academic integrity.

EVALUATION PROCEDURES

GRADING SCALE

This grading scale outlines how final grades are determined based on the total points earned in the course. Each letter grade corresponds to a specific range of percentages or points.

Course Specific Requirements, Expectations, Policies

Class Attendance

This course will be delivered entirely **online** through Canvas, where you will access lessons, course materials, and learning resources. Throughout the semester, you will complete a mix of self-paced activities, including scheduled chat sessions and discussion assignments based on the weekly audio and video materials. Each week, please plan to actively participate in these discussions based on the audio and video materials, slides, and assignments posted in Canvas, these are the online equivalent of our regular class meeting time. If you have questions or would like extra support, you are always welcome to schedule time with the course instructor. To make the most of these discussions, please review the assigned online and textbook materials in advance, just as you would when preparing for an on-campus class. Weekly labs/exercises/discussions are graded and will count toward your final course grade, along with your midterm and final exams and others (see the **Evaluation Procedures** section above for more details).

Assignments

Classwork and homework may be assigned and may serve as the basis for in-class discussions. To support meaningful learning, students are expected to come to class prepared and engaged, with the goal of developing a thorough understanding of the course material. A due date will be provided on Canvas or announced in class for each weekly homework assignment. All assignments are due by the end of the day on the posted due date. Please pay close attention to assignment and exam deadlines. In general, deadlines will not be extended, and late submissions are not accepted.

Generally, assignments are required to be submitted to Canvas. Do not use KSU email to email/submit your work.

Excused Absences

For any excused absence, all make-up assignments must be completed within one week.

Student Responsibilities

If you need to miss a class or are unable to complete the weekly assignments, please remember that you are responsible for staying up to date with course expectations. This includes checking what assignments were given, noting any announced due dates, and reviewing the material covered during your absence.

Use of Instructional Technology

Kentucky State University supports instructional uses of technology in the classroom for classroom-based purposes at the instructor's discretion and direction. (See the student handbook at <https://tinyurl.com/2022-2023student>)

Canvas

Course Syllabus will be posted on the course Canvas site (<https://kysu.instructure.com/>).

The materials provided on Canvas are intended for educational use only. Please do not share, upload, or distribute these materials on the internet or to others outside this course.

For other tutorials over other KSU software systems (e.g. SafeAssign, Upswing, etc.), visit the Kentucky State University Distance Education Online Resource (<https://tinyurl.com/KSUonlineresources>).

Additional Resources

- **Paul G Blazer Library:** KSU Library main page (<https://www.kysu.edu/academics/library/>)
- **The Thorobred Learning Center (TLC):** The Thorobred Learning Center (<https://tinyurl.com/KSUTLC>) is an academic support unit designed to facilitate student success, retention, and graduation. The Center provides comprehensive learning assistance to meet the academic demands of all students along all points of their academic careers. The TLC Center is located on the 4th floor of the Julian M. Carroll ASB building, Suite 406 and can be reached by emailing tlc@kysu.edu or calling 502-597-5599.
- Students can stay current on activities and services provided by the TLC Center by visiting the TLC Instagram account (https://www.instagram.com/kysu_tlc/), as well.

Academic Honesty

All students must conduct their studies at KSU honestly, ethically and in accordance with accepted standards of academic conduct. See the Academic Conduct section of the 2022-2023 KSU Student

Handbook (tinyurl.com/2022-2023student) (pp. 19-21). Cheating and plagiarism will result in a score of zero on that particular test or assignment and thus lowering of grade in the course.

- **Cheating:** Cheating is defined as the fraudulent or deceptive taking, giving, or presenting of any information or material with the intent of aiding oneself or another on any academic work which is considered in any way in the determination of a course grade. Cheating includes but is not limited to copying a hand-in assignment, looking on another person's exam during a test, signing in for someone else, inappropriate use of technology during an exam (like having a cell phone on during a test), and the un-permitted use of "cheat sheets" or using internet sites.

Copying and pasting from the internet is considered cheating as you are using the intellectual property of someone else and turning it in as you own work. In addition, **the use of AI to complete assignments and or submissions will not be tolerated, except for special circumstances explicitly stated earlier, any use of AI tools must be fully disclosed.**

Cheating may result in an F in the class. It may also result in expulsion from the university.

In addition,

- Documentation of cheating will be provided by the instructor to the school chair, college dean, and registrar for implementing into student record. It will be up to the instructor if a second attempt is made possible for completing that exam, assignment or activity.
- Bathroom breaks will not be allowed during exams/tests. Any student leaving the classroom or lab during an exam/test. The exam/test will be turned in with no additional time or retake.
- No cell phones, ear buds, earmuffs, large coats, head coverings, caps or hats will be allowed during exams/tests.
- Not following these stipulations, you may be asked to leave the classroom or lab.
- **Plagiarism:** Plagiarism is the intentional or unintentional act of submitting the work of another as one's own. It includes the submission of the complete or partial work, or of the words, ideas, or format of another, published or unpublished, without appropriate reference and source credit. It includes employing or permitting another person to produce, alter, or revise material which the student submits as his or her own. If the student has any uncertainty regarding plagiarism in the submission of any material to his or her instructor, he or she should discuss the matter with the instructor prior to submission of the material.
- **Forgery:** Forgery is falsely recording the signature of an advisor, instructor, or any university official on any official University academic document.

Notice to Students with Disabilities

The mission of the Testing and Disability Services is to facilitate equal access to KSU's campus, programs, activities, and services, in accordance with federal and state regulations and University policies. We support this mission by applying eligibility guidelines and coordinating the delivery of appropriate accommodations so that students with disabilities can pursue their educational goals. Additionally, we promote greater disability awareness campus wide. The University also provides reasonable accommodations to students and campus visitors with disabilities through Testing and Disability Services in Hathaway Hall room 107. Students with disabilities are invited to contact Dr. Phillip Clay in the DRC at 502-597-6041 for information on eligibility, required documentation, and available services. Additional information concerning the DRC and accommodations can be found by visiting the Kentucky State University Office of Accessibility and Disability Services (<https://www.kysu.edu/academics/disability-svcs/index.php>).

Statement on Veterans Affairs

Kentucky State University's Veterans Affairs Coordinator provides information regarding educational benefits from the Department of Veterans Affairs (DVA), assists in applying for GI Bill© benefits, certifies enrollment to the Veterans Affairs (VA) for payment each semester, and assists in resolving payment problems. For more information about educational benefits programs for Veterans, contact the Department of Veterans Affairs (<https://benefits.va.gov/gibill/>) at 1-888-442-4551 and visit Kentucky State University's Veteran and Military Student Affairs (<https://www.kysu.edu/academics/vet-and-mil-affairs/index.php>) online.

Mission Statement

The Objectives and Learning Outcomes of this course directly support the Mission of Kentucky State University (<https://www.kysu.edu/about-ksu/mission-vision-core-values.php>).

Kentucky State University is a public, comprehensive, historically black land-grant university committed to advancing the Commonwealth of Kentucky, enhancing society, and impacting individuals by providing quality teaching with a foundation in liberal studies, scholarly research, and public service to enable productive lives within the diverse global economy.

Based on practical class needs, 😊 the instructor reserves the right to make changes or impose additional requirements as necessary.

  Syllabus Acknowledgement Form is to be completed and submitted the FIRST week of this course. NO Exceptions. Any student NOT submitting this form the FIRST week is applicable to be dropped from this course.

Student Acknowledgement of Receipt of Course Information

My signature below indicates that I have received a course syllabus for the following course,  and have been notified of the Policies Governing Student Conduct described in the Kentucky State University Student Handbook (<https://tinyurl.com/2022-2023student>) and Miscellaneous Policies in the University Catalogue (<https://www.kysu.edu/academics/registrar/select-a-catalog.php>).

I agree to read these documents, and I agree to sign and deliver this copy of the "Student Acknowledgment" form within two (2) weeks of the start of the semester. I understand that the policies contained within these documents apply directly to me and to all students in the class. I agree to abide by these policies and recognize that not abiding by these policies could result in dismissal from this class and/or affect my standing as a student at KSU as described in the Policies Governing Student Conduct in Student Handbook and Miscellaneous Policies in the University Catalogue.
